Publishing Department: PO Box 8, Southgate House, Stevenage, Herts. SG1 1HQ. England

Volume 128 1981 UK ISSN 0143–7054

HONORARY EDITORS
Dr. D.W. Clarke *University of Oxford*
Prof. N. Munro *UMIST*

Pages in issues of *IEE Proceedings Part D*, 1981

Pages	Issue no.	Date
1–32	1	January
33–76	2	March
77–128	3	May
129–164	4	July
165–252	5	September
253–300	6	November

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to ten copies of an IEE paper or article.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made in the USA for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per-copy fee through the Copyright Clearance Center, Inc. for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes for creating new collective works or for resale.

Photocopies of individual papers published in the IEE Proceedings can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

Subject index

ADAPTIVE CONTROL

Adaptive estimator for automatic guidance of an unmanned submersible. G.T.Russell and J.Bugge p223
Adaptive Kalman filter for control of systems with unknown disturbances. M.J.Grimble p263
Deterministic convergence of a self-tuning regulator with variable forgetting factor. A.Osorio Cordero and D.Q.Mayne p19
Discrete adaptive regulation of not-necessarily minimum-phase systems. C.Samson and J-J.Fuchs p102
Recursive least-squares algorithm revisited. Jean-JacquesJ.Fuchs p74
Stability and convergence of adaptive controllers - continuous systems. P.C.Parks p195

ALGEBRA
(incl. Matrix Algebra)

Banach-space theory of analytic systems. J.F.Barrett p188
Block-tridiagonal state-space representations for a class of square invertible systems. A.D.Field and D.H.Owens p30
Certain practical considerations in the model-following method of decentralised control. C.Yuliu and M.G.Singh p149
Limit-cycle prediction in sampled data systems. R.Cameron and B.Kouvaritakis p219
Recursive least-squares algorithm revisited. Jean-JacquesJ.Fuchs p74

BIOMEDICAL ENGINEERING

Time-domain system identification applied to noninvasive estimation of cardiopulmonary quantities. R.A.Bache, W.M.Gray and D.J.Murray-Smith p56

CLOSED-LOOP SYSTEMS

Design of optimal output regulators using multivariable root loci. M.J.Grimble p41
Generalised decoupled-control synthesis for invertible nonlinear systems. S.N.Singh p157
Indirect identification and control of a laboratory system. M.M.Sharaf and B.W.Hogg p253
Multivariable pole-assignment self-tuning regulators. D.L.Prager and P.E.Wellstead p9
Singular-perturbation method for discrete models of continuous systems in optimal control. P.K.Rajagopalan and D.S.Naidu p142

COMPUTER APPLICATIONS

Robust decentralised control of a servomechanism problem for a class of nonlinear systems. R.Doraiswami p33

CONTROL EQUIPMENT AND APPLICATIONS

Adaptive estimator for automatic guidance of an unmanned submersible. G.T.Russell and J.Bugge p223
Adaptive Kalman filter for control of systems with unknown disturbances. M.J.Grimble p263
Bang-bang control law for single-input-time-invariant plant. S.J.Dodds p227
Certain practical considerations in the model-following method of decentralised control. C.Yuliu and M.G.Singh p149
Criterion to assess stability of a 'lowest wins' control strategy. A.M.Foss p1
Decentralised controller with online interaction trajectory improvement. M.F.Hassan and M.G.Singh d162
Deterministic convergence of a self-tuning regulator with variable forgetting factor. A.Osorio Cordero and D.Q.Mayne p19
Identification and direct digital control of an electric arc furnace controller. A.S.Morris and M.J.H.Sterling p123
Indirect identification and control of a laboratory system. M.M.Sharaf and B.W.Hogg p253
Robust decentralised control of a servomechanism problem for a class of nonlinear systems. R.Doraiswami p33
Self optimising combustion control of an oil-fired power station boiler. P.H.Jenkins and A.H.Williams p50
Self-tuning charge control scheme for domestic stored-energy heating systems. A.L.Dexter and R.G.Hayes p292
Self-tuning control for systems employing feedforward. A.Y.Allidina, F.M.Hughes and C.Tye p283

CONTROL-SYSTEM SYNTHESIS

APL and graph theory in dynamic systems analysis. C.Schizas and F.J.Evans p85
Control system design using graphical decomposition techniques. F.J.Evans, C.Schizas and J.Chan p77
Generalised decoupled-control synthesis for invertible nonlinear systems. S.N.Singh p157
Multivariable pole-assignment self-tuning regulators. D.L.Prager and P.E.Wellstead p9
Self-tuning control for systems employing feedforward. A.Y.Allidina, F.M.Hughes and C.Tye p283
Stability of limit cycles in feedback systems containing a relay. R.Balasubramanian p24

CONTROL THEORY

APL and graph theory in dynamic systems analysis. C.Schizas and F.J.Evans p85
Bang-bang control law for single-input-time-invariant plant. S.J.Dodds p227
Observers and minimum-energy controls for nonlinear systems. A.J.Pritchard p185
Polynomic systems theory: A review. P.E.Crouch d161
State-space approach for self-tuning feedback control with pole assignment. Y.T.Tsay and L.S.Shieh p93

DIGITAL COMPUTERS AND COMPUTATION

Identification and direct digital control of an electric arc furnace controller. A.S.Morris and M.J.H.Sterling p123
Multivariable pole-assignment self-tuning regulators. D.L.Prager and P.E.Wellstead p9

ENERGY CONVERSION AND STORAGE

Self-tuning charge control scheme for domestic stored-energy heating systems. A.L.Dexter and R.G.Hayes p292

FEEDBACK

Analysis and design of nonlinear feedback systems. D.P.Atherton p173
Chaos. A.I.Mees and C.T.Sparrow p201
Generalised decoupled-control synthesis for invertible nonlinear systems. S.N.Singh p157
Off-axis multivariable circle stability criterion. C.J.Harris and R.K.Husband p215
Periodic oscillations in pulse-modulated systems. U.M.Rao and D.P.Atherton p129
Stability of limit cycles in feedback systems containing a relay. R.Balasubramanian p24

FILTERS, FILTERING AND PREDICTION THEORY

Adaptive Kalman filter for control of systems with unknown disturbances. M.J.Grimble p263
New approach to filtering for nonlinear systems. M.H.A.Davis p166

GENERATORS

Evaluation of online identification methods for optimal control of a laboratory model turbogenerator. M.M.Sharaf and B.W.Hogg p65

GRAPH THEORY AND TOPOLOGY

APL and graph theory in dynamic systems analysis. C.Schizas and F.J.Evans p85
Control system design using graphical decomposition techniques. F.J.Evans, C.Schizas and J.Chan p77

MATHEMATICAL TECHNIQUES

Adaptive estimator for automatic guidance of an unmanned submersible. G.T.Russell and J.Bugge p223
Adaptive Kalman filter for control of systems with unknown disturbances. M.J.Grimble p263
Analysis and design of nonlinear feedback systems. D.P.Atherton p173
Bang-bang control law for single-input-time-invariant plant. S.J.Dodds p227
Block-tridiagonal state-space representations for a class of square invertible systems. A.D.Field and D.H.Owens p30
Certain practical considerations in the model-following method of decentralised control. C.Yuliu and M.G.Singh p149
Degeneracy in nonlinear least squares. A.van den Bos p109

Deterministic convergence of a self-tuning regulator with variable forgetting factor. A.Osorio Cordero and D.Q.Mayne p19
Discrete adaptive regulation of not-necessarily minimum-phase systems. C.Samson and J-J.Fuchs p102
Estimation of the Volterra functional series of a nonlinear system using frequency-response data. P.J.Lawrence p206
Generalised decoupled-control synthesis for invertible nonlinear systems. S.N.Singh p157
Geometric structures in systems theory. P.E.Crouch p242
How to obtain a simple inverse Z-transform of a rational function of z. J.Staar and J.Vandewalle p275
Multivariable pole-assignment self-tuning regulators. D.L.Prager and P.E.Wellstead p9
New approach to filtering for nonlinear systems. M.H.A.Davis p166
Observers and minimum-energy controls for nonlinear systems. A.J.Pritchard p185
On the state estimation of large-scale continuous-time linear systems. A.K.Mahalanabis and G.Ray p137
Polynomic systems theory: A review. P.E.Crouch d161
Recursive least-squares algorithm revisited. Jean-JacquesJ.Fuchs p74
State-space approach for self-tuning feedback control with pole assignment. Y.T.Tsay and L.S.Shieh p93

MULTIVARIABLE CONTROL SYSTEMS

Analysis and design of nonlinear feedback systems. D.P.Atherton p173
Block-tridiagonal state-space representations for a class of square invertible systems. A.D.Field and D.H.Owens p30
Design of optimal output regulators using multivariable root loci. M.J.Grimble p41
Evaluation of online identification methods for optimal control of a laboratory model turbogenerator. M.M.Sharaf and B.W.Hogg p65
Limit-cycle prediction in sampled data systems. R.Cameron and B.Kouvaritakis p219
Multivariable pole-assignment self-tuning regulators. D.L.Prager and P.E.Wellstead p9
Off-axis multivariable circle stability criterion. C.J.Harris and R.K.Husband p215
Prediction of limit cycles in multivariable nonlinear systems. J.O.Gray and N.B.Nakhla p233

NETWORKS

On the state estimation of large-scale continuous-time linear systems. A.K.Mahalanabis and G.Ray p137
State-space approach for self-tuning feedback control with pole assignment. Y.T.Tsay and L.S.Shieh p93

NONLINEAR SYSTEMS

Adaptive estimator for automatic guidance of an unmanned submersible. G.T.Russell and J.Bugge p223
Analysis and design of nonlinear feedback systems. D.P.Atherton p173
Banach-space theory of analytic systems. J.F.Barrett p188
Chaos. A.I.Mees and C.T.Sparrow p201
Criterion to assess stability of a 'lowest wins' control strategy. A.M.Foss p1
Estimation of the Volterra functional series of a nonlinear system using frequency-response data. P.J.Lawrence p206
Evaluation of online identification methods for optimal control of a laboratory model turbogenerator. M.M.Sharaf and B.W.Hogg p65
Generalised decoupled-control synthesis for invertible nonlinear systems. S.N.Singh p157
Geometric structures in systems theory. P.E.Crouch p242
Indirect identification and control of a laboratory system. M.M.Sharaf and B.W.Hogg p253
Lagrange-Charpit method and stability problem of power systems. H.Miyagi and T.Taniguchi p117
Limit-cycle prediction in sampled data systems. R.Cameron and B.Kouvaritakis p219
New approach to filtering for nonlinear systems. M.H.A.Davis p166
Nonlinear systems theory and design (Editorial). S.A.Billings and D.H.Owens p165
Observers and minimum-energy controls for nonlinear systems. A.J.Pritchard p185
Off-axis multivariable circle stability criterion. C.J.Harris and R.K.Husband p215
Practicable identification of nonstationary nonlinear systems. V.Z.Marmarelis p211
Prediction of limit cycles in multivariable nonlinear systems. J.O.Gray and N.B.Nakhla p233
Recent results in realisation theory of systems with discrete-time bilinear and multilinear response maps. M.J.Denham p181
Robust decentralised control of a servomechanism problem for a class of nonlinear systems. R.Doraiswami p33
Stability of limit cycles in feedback systems containing a relay. R.Balasubramanian p24

OPTIMAL CONTROL

Design of optimal output regulators using multivariable root loci. M.J.Grimble p41
Evaluation of online identification methods for optimal control of a laboratory model turbogenerator. M.M.Sharaf and B.W.Hogg p65
Indirect identification and control of a laboratory system. M.M.Sharaf and B.W.Hogg p253
Robust decentralised control of a servomechanism problem for a class of nonlinear systems. R.Doraiswami p33
Self optimising combustion control of an oil-fired power station boiler. P.H.Jenkins and A.H.Williams p50
Singular-perturbation method for discrete models of continuous systems in optimal control. P.K.Rajagopalan and D.S.Naidu p142
Suboptimality introduced by discretisation in time-optimal control systems. A.A.Dickie and M.P.J.Scott p279

PERTURBATION THEORY

Decentralised controller with online interaction trajectory improvement. M.F.Hassan and M.G.Singh d162
Singular-perturbation method for discrete models of continuous systems in optimal control. P.K.Rajagopalan and D.S.Naidu p142

POWER SYSTEMS AND PLANT

Dynamic stability evaluation for multimachine system: an efficient eigenvalue approach. Z.Erazaz and N.K.Sinha p268
Lagrange-Charpit method and stability problem of power systems. H.Miyagi and T.Taniguchi p117
Self optimising combustion control of an oil-fired power station boiler. P.H.Jenkins and A.H.Williams p50

PULSE-CODE MODULATION

Periodic oscillations in pulse-modulated systems. U.M.Rao and D.P.Atherton p129

RELAYS

Analysis and design of nonlinear feedback systems. D.P.Atherton p173
Stability of limit cycles in feedback systems containing a relay. R.Balasubramanian p24

REVIEW OF PROGRESS

Polynomic systems theory: A review. P.E.Crouch d161
Recent results in realisation theory of systems with discrete-time bilinear and multilinear response maps. M.J.Denham p181

SIGNAL PROCESSING

Time-domain system identification applied to noninvasive estimation of cardiopulmonary quantities. R.A.Bache, W.M.Gray and D.J.Murray-Smith p56

SIMULATION

Certain practical considerations in the model-following method of decentralised control. C.Yuliu and M.G.Singh p149
Criterion to assess stability of a 'lowest wins' control strategy. A.M.Foss p1
Decentralised controller with online interaction trajectory improvement. M.F.Hassan and M.G.Singh d162
Discrete adaptive regulation of not-necessarily minimum-phase systems. C.Samson and J-J.Fuchs p102
Estimation of the Volterra functional series of a nonlinear system using frequency-response data. P.J.Lawrence p206
Evaluation of online identification methods for optimal control of a laboratory model turbogenerator. M.M.Sharaf and B.W.Hogg p65
Identification and direct digital control of an electric arc furnace controller. A.S.Morris and M.J.H.Sterling p123
Indirect identification and control of a laboratory system. M.M.Sharaf and B.W.Hogg p253
Polynomic systems theory: A review. P.E.Crouch d161
Time-domain system identification applied to noninvasive estimation of cardiopulmonary quantities. R.A.Bache, W.M.Gray and D.J.Murray-Smith p56

STABILITY

Analysis and design of nonlinear feedback systems. D.P.Atherton p173
Criterion to assess stability of a 'lowest wins' control strategy. A.M.Foss p1
Decentralised controller with online interaction trajectory improvement. M.F.Hassan and M.G.Singh d162
Dynamic stability evaluation for multimachine system: an efficient eigenvalue approach. Z.Erazaz and N.K.Sinha p268
Lagrange-Charpit method and stability problem of power systems. H.Miyagi and T.Taniguchi p117
Off-axis multivariable circle stability criterion. C.J.Harris and R.K.Husband p215
Polynomic systems theory: A review. P.E.Crouch d161
Robust decentralised control of a servomechanism problem for a class of nonlinear systems. R.Doraiswami p33
Stability of limit cycles in feedback systems containing a relay. R.Balasubramanian p24

TRANSFORMS

How to obtain a simple inverse Z-transform of a rational function of z. J.Staar and J.Vandewalle p275

Book Reviews

3rd symposium on theory and practice of robots and manipulators: P.G. Davey p18
Analysis and design of dynamic systems: I. Cochin p156
Complex variable methods for linear multivariable feedback systems: A.G.J. MacFarlane p73
Modelling of dynamical systems, Vol.1: H. Nicholson p73
Parameter estimation: principles and problems: H.W. Sorenson p156
Stochastic models, estimation and control: P.S. Maybeck p92

Conference Report

Control and its applications p252
